

BREATHE RIGHT, SLEEP TIGHT

Dear Patient,

Having a sleep disorder can be a very challenging issue. We want to help you find success in overcoming your sleeping hang-ups in anyway we can.

Your sleep specialist may find that your sleep disorder is a symptom of irregular breathing. That is why we at Bozeman Health Home Oxygen have partnered with Bozeman Health Sleep Disorders Center in finding the right solution for you. We will work with your physician and technicians in finding the specific sleeping equipment necessary to help you start breathing right, so you can start sleeping tight.

We work in conjunction with the Sleep Disorders Center's loaner mask program, allowing you to try as many different options as needed—with no obligation to buy—until you find the perfect fit.

Plus, we are located right around the corner from the Sleep Disorders Center, so you don't have to go anywhere else to find what you need.

Please stop in on your way to or from your sleep appointment. We'd love to introduce ourselves and hopefully help you get some sleep.

Sincerely,

A handwritten signature in black ink, appearing to read 'Merle Phipps'.
